DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Response to Arguments

1. Applicant's arguments, see Response, filed on May 14, 2003, with respect to the rejection(s) of claim(s) 1 under Nagata (5,877,591) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Honda et al. (6,307,321) and Inukai et al. (4,721,887).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Honda.

Honda discloses a lamp comprising a luminescent tube (Figure 1, element 1) containing a pair of facing electrodes (3), and side tubes (1b) extending from opposite sides of the luminescent tube, a portion of the electrodes being sealed within the side tubes, wherein a small space is provided between the electrodes and an inner surface of the side tubes (Figure 1, space between elements 3 and 1b).

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Inukai et al. (4,721,887).

Inukai discloses a lamp comprising a luminescent tube (Figure 1, element 1) containing a pair of facing electrodes (3), and side tubes (21) extending from opposite sides of the luminescent tube, a portion of the electrodes being sealed within the side tubes, wherein a small space (31, 33) is provided between the electrodes and an inner surface of the side tubes for enabling the electrodes to expand and contract freely

Art Unit: 2879

without compression along their axes due to a difference in indices of expansion of materials that make up the electrodes and the side tubes (column 3, lines 39-42).
